Creature Creation Kit:

Name:

Spindleheart: Trail of Shadow and Spool Book Activity

Directions: Throughout the book **Spindleheart:Trail of Shadow and Spool** we come across a vast array of plant, animal, and insect species that seem to resemble our own. They all have their own quirky traits and adaptations that help them survive in such a wild and strange world.

Well now dear reader, it's time you to create a unique species of your own in **6 steps**.

☐ Step 1: creature Name:

Name your creature on the line below. It can be anything you want. Like a bellowing dragon shark, or a viper-o-griff, or a flying boar. Need time to think? No worries, just skip this step and come back when your done.

Creature Name:

☐ Step2: Habitat/Biome:

Like animals, creatures tend to live in environments they're comfortable in, and have a good chance surviving in. Does your creature prefer high forest treetops where they can hide from dangerous predators, and store their food in tree trunks, sort of like squirrels. Or maybe your creature prefers somewhere near water to hunt fish or swim. Where does your creature live? Why?

☐ Step 3: Adaptations:

Adaptations are basically special traits that allow animals and creatures alike to survive in their home. Sort of like how California condors have a long wings for gliding long distances, or how Sea otters have webbed feet to help them swim thorough rough river currents. *What's your creature's adaptation? How does it help them survive?*

☐ Step 4: Diet

Unlike humans, grocery stores and pizza delivery aren't quite an option. Animals have to forage or hunt for their food, same with creatures. *What does your creature eat? How does your creature find food?*

☐ Step 5: Behavior/Fun Fact

Many species tend to have an odd fact about them that makes them stand out from other living things. Like how cheetahs can run up to 80 miles per hour. *What's a cool or weird fact about your creature?*

☐ Step 6: Draw what your unique creature looks like:

Your creature Creation:	

Presto! A new creature!
